

MyTrack Feeder – Needs Fibonacci Trader version 3.14 or later

To use MyTrack you will need first to download their software, you can do that at <http://www.mytrack.com>.

If you want just stocks delayed data the service is free, you just need to subscribe.

To collect data into the Fibonacci Trader program you need to subscribe to their service plus add a feature called SDK. This feature cost US25 a month and that enables 3rd part software to connect with their service, then the less expensive service of data will cost US25, the delayed service plus the SDK.

To have the SDK working run their program, click on CHAT, on Entitlements and then on Features. Check the box SDK. You must already given a valid credit card, for that click on Administrative, Credit Card.

Their service limits the number of symbol that you can collect real time data. For the basic service (delayed data) you can collect data for 25 symbols. Other services for real time data are available, look on their web site for information on the number of symbols that you can have and prices.

On the Fibonacci Trader program, click on UTILITIES, DATA SOURCE, SELECT LIVE FEEDER, check the option MyTrack, click OK.

The Client for MyTrack server window will appear. Type your user name and password, click Logon.

Client for MyTrac Server
