

WORKSHOPS THAT WORK

ROBERT KRAUSZ'S

FIBONACCI TRADER™
WORKSHOP

Featuring **DENNIS BOLZE**

with special guest speaker:
THOM HARTLE

Applications for the Fibonacci Trader™ software

May 1-3, 2004 (Saturday 2:30pm-6pm, Sunday 9am-6pm & Monday 8am-5pm)

We want to thank you for your feedback, requests and suggestions... and we are listening! We're happy to announce our next workshop - and we're tailoring it to your needs and requests. This workshop is designed to help you get the most out of the Fibonacci Trader™ software. This will be a hands-on, intensive, training workshop which will include live, real-time, open-to-close demonstration. Learn how to get the most out of the software from actual traders who are using it successfully! Bring your laptop for hands-on training.

FIBONACCI TRADER WORKSHOP WITH DENNIS BOLZE:

- Learn about the odds in trading, then experiment with money management... learn how to shift the odds in your favor.
- Experience hands-on building of charts and constructing a trading plan.
- Find a trigger to enter the trade as well as learn to do a proper backtest.
- Learn stop placement and targets, and how to design this trading plan to fit your style of trading and risks.
- Learn a new 'fib' tool and how to link it and find support and resistance in the market.
- We will have a real-time live trading demonstration from open until close!
- You will leave this workshop with a clearer idea of how to trade, how to develop a trading plan and backtest it, and how to find the safe low risk entry for a trade.

SPECIAL GUEST PRESENTATION BY THOM HARTLE:

- Specific ways to improve your favorite trading approaches.
- How to use the exchange volume statistics to confirm the trend.
- How to interpret exchange volume statistics as an early warning to trend changes.
- Swing trading methods based on Thom Hartle's own private indicator, the HPO (Hartle Prospect Oscillator).

Dennis Bolze: Some of you will remember Dennis from his guest presentation at our Fibonacci Trader workshop in April of 2002. He did a super presentation for us at the Trader's Expo last November too. During his years at Hat Trading Corp., based at the Chicago Mercantile Exchange, he worked his way up to the Chief Trading Analyst. Dennis was a weekend feature on Lewis Borsellino's Teach Trade website, and he spoke about combining market internals with fibonacci confluences at Carol Boroden's Syncmt.com trade-a-longs.

Thom Hartle is president of Market Analytics, Inc. He worked with Robert Krausz on a number of projects including the *Fibonacci Trader Journals*, *Wizard On Wall Street*, and other projects. His twenty plus years in the markets began at on the sell side of Wall Street at Merrill Lynch, next, after moving to Drexel Burnham Lambert, he was appointed Vice President Financial Futures, and worked with large institutions. Five years later, he left the sell side of Wall Street and became a trader for the Federal Home Loan Bank of Seattle. Then for nine years, he was Editor of *Technical Analysis of Stocks & Commodities Magazine*. Today, he works with private traders, writes for *Active Trader Magazine*, and trades for himself. He recently released the *Hartle Prospect Oscillator*, his own proprietary indicator for traders, (www.thomhartle.com).

NEW TECHNIQUES FOR THE NEW MILLENNIUM
